DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 1 is indefinite since it refers to the nitro-4-bromoacetamide as "formula 1". Formula 1 is the compound 3,3',4,4' tetraminobiphenyl.

b) 3,3',4-4' tetraminobiphenyl in line 1 should be correctly written as 3,3',4,4' tetraminobiphenyl.

c) "methnol" in claim 3 should be correctly spelled as "methanol".

Applicant is respectfully requested to review the claims for other minor grammatical mistakes.

3. Claim 10 recites the limitation "the coupling agent" in 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Objections

4. Claims 8-10 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 8 broadens the reactants capable of being used in claim 1. Note that claim 1 is limited to the use of a specific aryl bromide and a specific boronic acid. The use of "aryl halides" and a "variety of boronic acids" actually broadens the claim on which it depends. Therefore, it fails to further limit the subject matter of a previous claim.

Claims 9 fails to further limit the base claim since the word "preferably" actually suggests that compounds other than NBA could be used in claim 1. Claim 1 teaches only the use of NBA.

Claim 10 fails to further limit the base claim since it sets forth the reactants in the language "selected from the group consisting of" However, in claim 1, only NBA and NAPB are used as reactants. No other reactants can be used without broadening the base claim. The recitation of the only reactants used in the base claim does not further limit the claim.

Allowable Subject Matter

5. Claims 1-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest the claimed process of making 3,3', 4,4' tetraminobiphenyl. The use of the claimed reactants is not suggested in the prior art.
